

INDIBA®

revitalizing lives

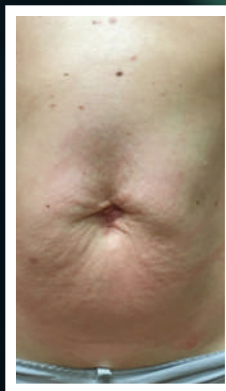

Healthy skin protects us and allows us freedom of movement, but also defines our external aesthetic aspect.

Damaged skin that retains fat nodules or does not heal properly limits our quality of life and can cause pain.

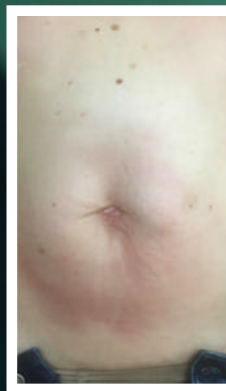

Physioaesthetics treatments:

- Drains tissues from the inside
- Acts on localized fat
- Improves skin tone
- It is effective in buttocks, breasts and

ACTIV

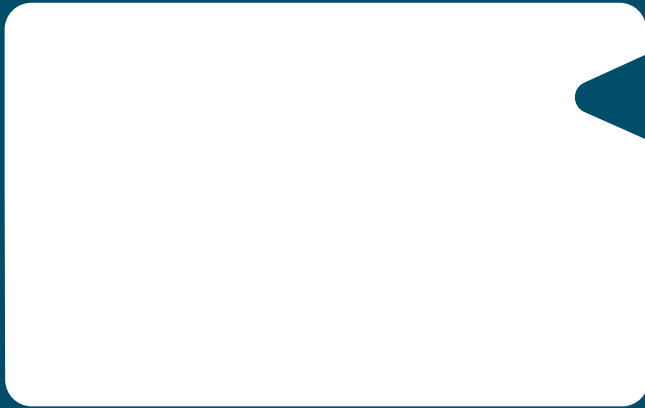

*A new wave of
MSK treatment*

INDIBA® is the market leader in radio frequency treatments, for reducing pain and accelerating the natural recovery of the body.

The INDIBA device generates a safe, pain free, electromagnetic wave that introduces energy to the body. This causes bio-stimulation and a thermal effect, which complements your recovery and can improve results from your first treatment.

PHYSIOAESTHETICS

One of the fundamental objectives of your physiotherapist is to maintain elasticity and soft tissue functionality, but physio-aesthetic treatment seeks to do so at the same time that the appearance is improved Aesthetic skin.

In cases such as after surgery or of a C-section, INDIBA can help you reduce inflammation and bruising and by same time favor that appearance and scar and skin quality be the best possible. INDIBA can accelerate healing and reduce inflammation and bruising to promote proper healing.

You can use INDIBA TO:

- Improve skin condition
- Localized fat treatments
- Cellulitis treatments

Physioesthetic treatments not only they can help you improve pain and circulation, but thanks to the integration that the physiotherapist performs with techniques manuals, can favor drainage lymphatic and the aesthetic appearance of cellulite and of the general condition of the skin.
